EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bernard Codd on 6 August 2004.

The application has been amended as follows:

IN THE CLAIMS:

Claim 6:

In claim 6, line 6, delete "third" and insert therefore --second--.

Claim 7:

In claim 7, line 5, delete "third" and insert therefore --second--.

In the last line of claim 7, please add a period at the end of the claim.

Claim 8:

In claim 8, line 5, delete "third" and insert therefore --second--.

In the last line of claim 8, please add a period at the end of the claim.

Claim 12:

In the last line of claim 12, please add a period at the end of the claim.

Claim 13:

In the last line of claim 13, please add a period at the end of the claim.

2. Reasons for the amendment:

In claims 6-8, the word "third" was changed to "second" for clarification purposes only.

3. Claims 1-15 are allowed.

4. The following is an examiner's statement of reasons for allowance:

With respect to claims 1-5, the closest prior art of record, Miyashita et al. do not disclose, teach, or suggest the distinguishing feature that the first pervoskite solid electrolyte layer exhibiting mixed conductivity and having oxygen ion conduction which is stronger than electron conduction under operational condition of the solid oxide fuel cell.

With respect to claims 6-15, the closest prior art of record, JP 09-063603 discloses a solid oxide fuel cell comprising an electrolyte comprising an ion conductive layer with high ion conductivity and a supporting layer 4 with low ion conductivity and the ion conductive layer

with high ion conductivity can be formed on either a fuel electrode side or an air electrode side of an electrolyte or on both surfaces of the electrolyte (see abstract and Figure 1) but the reference does not disclose, teach, or suggest that the supporting layer with low ion conductivity is a perovskite (see paragraph 18 of machine translation and Table 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
